

Consistent Product Quality and Enhanced Customer Satisfaction

Polarizer-Supplier CODIXX Awarded ISO 9001:2015 Certification

LASER COMPONENTS USA, a specialized provider of laser and optoelectronic components in the US and Canada, is proud to announce its supplier CODIXX has achieved ISO 9001:2015 certification for the development, production, and sales of polarizers. The certification is a renewal and improvement from the previously obtained ISO 9001:2008 standard.

ISO 9001 is an internationally agreed standard for quality management. It helps organizations meet customer and regulatory requirements in a consistent and efficient way. To transition to the 2015 revision, CODIXX was rigorously audited by TÜV-Nord CERT, an accredited certification body. Individual business processes, document control, and management were reviewed with a greater emphasis on risk-based thinking and leadership when compared to the previous standard.

"The quality management system enables us to meet and exceed our customer expectations," explained Jens Staender, CODIXX quality management representative. "We work in close collaboration with our customers to design and produce high quality products and utilize processes that are continuously improved to achieve these goals. Our employees are actively engaged to keep this level of commitment, all of which is embedded in our company culture."

CODIXX' dichroic glass polarizers are exclusively available in North America through LASER COMPONENTS USA, Inc. since 2004. A team of experienced sales engineers support the product line for all spectral ranges, contrast conditions and designs.

Trade Shows

SPIE Optics+Photonics, August 19 - 23, 2018, San Diego, CA, USA, **Booth 527**
Photon 2018, September 04 - 05, 2018, Aston University, **Booth 5**
SPIE Security & Defense, September 11 - 13, 2018, Berlin, Germany **Stand 403**
Photonex Europe, October, 10 - 11, 2018, Ricoh Arena, Coventry, UK, **Booth D15**
Vision, November 06 - 08, 2018, Messe Stuttgart, Germany, **Booth 1G31**
electronica, November 13 - 16, 2018, Messe München, Germany, **Booth B3.524**

About Laser Components

LASER COMPONENTS specializes in the development, manufacture, and sale of components and services in the laser and optoelectronics industry. At LASER COMPONENTS, we have been serving customers since 1982 with sales branches in five different countries. We have been producing in house since 1986 with production facilities in Germany, Canada, and the United States. In-house production makes up approximately half of our sales revenue. A family-run business, we have more than 220 employees worldwide.

About CODIXX

CODIXX AG is a medium-sized company with around 50 employees in Saxony-Anhalt, Germany. The core business is the production of customized high-quality polarizers, known under the brand-name colorPol®. They are used as one of the key components in various applications worldwide. With the ISO certification as well as REACH, RoHS and PFOS compliant products, the corporation stands for quality and customer service made in Germany.
